

retirement and seniors living developments

The **ADW Johnson** survey team has a long history of providing services to seniors living estates, retirement villages and aged care facilities. The last decade, with changing demographics, has seen a revolution in the expectations of the seniors market.

Our survey team works closely with consultant teams to identify and incorporate market demands. This includes not only issues of site suitability, access and topography but also titling and leasing tenure advice to ensure the product meets the market place expectations. Our survey team provides services such as site assessment and topographical survey, layout design, land tenure, titling and leasing advice together with construction setout and documentation for local Councils.
